Security and convenience built into a handy device. Implemented over a range of applications such as identity, access to secure regions, service availing, secure documents and backend redundancy.

COMMERCIAL PRINTING

Largest infrastructure to support commercial printing for different requirements. Enables single window approach to all aspects of commercial printing.

OFFSET PRINTING

Modern printing solution with multicolor and large volume printing infrastructure for supporting huge volume printing requirements.

VARIABLE DATA PROCESSING & PRINTING

Data processing and printing of the data to produce the final product in specified format. Giving life cycle history of data on real time basis for client information systems.

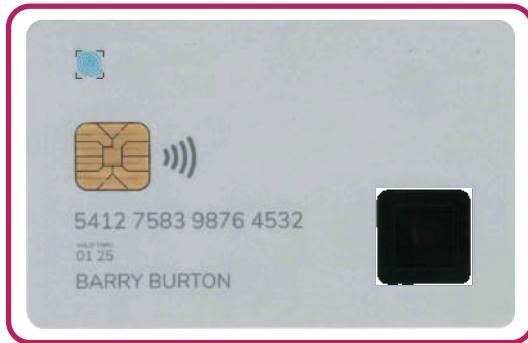

RESULT PROCESSING

Support for examination result processing including copying student data from remote server, reading the OMR for verifying student responses, comparing this with actual answer and generating mark list and results.

DIGITAL PRINTING

For supporting large volume printing, that envisage both static and variable printing, mainly targeting government identity programs.

BIOMETRICS AS A SOLUTION

1. Carry your Biometrics securely with you
2. Completely portable and stored within the secure element of a smart card
3. Secure algorithm to ensure that the biometric information is not accessible for modification/deletion
4. Biometrics match is done on the card and only feedback of correct or incorrect fingerprint is sent on a secure channel
5. Contact (ISO 7816) and Contactless (ISO 14443) modes are supported for Biometrics Match.
6. Customizable with a range of applications including
Personal Identification (authentication for special services and privileges),
Access Control to Secure Areas through matching of Biometrics
Social Service Schemes
Campus Attendance Marking
Logical Access
Personalized Vehicle Access
Electrical Vehicle Charging
Elevator Access with Smart Lift interfacing for Floor Access
7. Solution allows for interfacing with existing hardware controllers and solutions
8. SDK for interfacing to different applications
9. All components of the Solution (cards, Biometric authenticators, application software and application support) completely Made In India

BOOK PRINTING

"Empowering Education Through
Quality Print Solutions"

We are specialized in producing educational materials that meet the diverse needs of Schools, Universities, and Educational publishers.

Our commitment to excellence and innovation has made us a trusted partner in the educational sector.

◆ Our Services

- Textbook Printing
- Custom Binding Solutions
- Digital Printing
- Distribution and Fulfillment

◆ Our Commitment to Sustainability

We are dedicated to environmental stewardship by using eco-friendly materials and processes in our printing operations. Our sustainability initiatives include recycling programs and energy-efficient manufacturing practices.

SECURITY LABELS

Our labels are designed to offer both aesthetic appeal and robust security features, ensuring the authenticity and integrity of products across various industries.

- ◆ Unmatched Tamper Evidence
- ◆ Forgery-Proof Image Protection:
- ◆ Invisible Ink Authentication
- ◆ Customizable Security Design
- ◆ One-Time Use Security Film
- ◆ No Complex Equipment Required for Verification
- ◆ Ideal for High-Security Documents & IDs
- ◆ Substrate-Level Security Transfer
- ◆ High Deterrent Value

POLYCARBONATE CARDS

- ◆ Durability & Resistance
- ◆ Tamper-Proof Construction
- ◆ Advanced Security Features
- ◆ Laser Engraving
- ◆ Color Laser Shield
- ◆ Microtext & Hidden Images
- ◆ Environmental Stability

OPERATION SETUP

**Secured
Environment**

Pre-Press

**Printing
Process**

**Post press
Setup**

**Quality
Control**

**Logistics
& Dispatch**

I) SECURED ENVIRONMENT

Each and every job is processed under highly secure environment. Below setup has been done to ensure the same:-

- ◆ 151 NVR Camera's functional with 24*7 Surveillance.
- ◆ 90 days recording storage
- ◆ Control access door

- ◆ ERP application with System generated Challan
- ◆ Inventory Management
- ◆ Destruction of sensitive materials in presence of officials
- ◆ Server system with complete mirroring facility for data backup & firewall facility for the secured access to the data

II) PRE-PRESS

Printography is empowered with a highly skilled team of professionals comprising of passionate individuals

-
- 1) Designers
 - 2) CTP Professionals
 - 3) Technical Experts
 - 4) Proof Reader
 - 5) Software Development Team
 - 6) Data Processing Team
-

We have deployed one of most Advanced PDF generating Software Technology having capacity to generate 10,000 to 15,000 PDFs per minute consisting of 3-4 pages.

III) PRINTING PROCESS

At Printography, we are equipped with printing machines that offer outstanding productivity, reliability and excellent service. High-end sheet fed offset machines from Heidelberg to KBA Rapida with attached UV printing units produces large volumes of high quality prints.

Innovative web-fed offset machine viz Muller Martini offers printing of wide range of products like cheque, demand draft, dividend warrants and many more security printing products.

Apart from these offset machines, we are also equipped with high speed digital printing machines that excel at producing on demand and short print runs quickly.

The machineries list include Konica Minolta press and Xerox-314 that offers high output capabilities, color quality and ultra high speed.

IV) POST PRESS SETUP

Post-press is the point at which your graphic truly comes together, transforming a printed square sheet into a required custom product.

Once the printing process is over, we proceed to our final stage of finishing, where an array of post-printing services such as cutting, folding, creasing, lamination, binding, foiling are carried out with the help of various advanced machineries.

Our advanced machineries have in-built barcode identification system that performs automatic collation of sheets, folding & inserting into envelopes. This gives complete accuracy in jobs that has variable data on it.

We have machineries specialized for pasting and folding for faster and accurate processing of direct mailers & inland letters.

V) QUALITY CONTROL

At Printography, we ensure to check the incoming raw materials, the production process, and the finishing of the product with the specifications set by our clients.

The quality control team follows the standards and regulations, ultimately ensuring the quality product is received by the client

The evaluation process helps to prevent, eliminate the potential printing defects. By comparing the master sample with the data of the printed product, any inconsistency observed is ruled out.

All these necessary steps achieved by each and every process experts have resulted in making Printography ISO 9001 certified

VI) LOGISTICS & DISPATCH

We have our logistics tie-up with the Postal and Courier Agencies which makes it easier to manage the huge inventory and schedule the deliveries at faster speed.

The dispatch schedules are well-planned and systematically managed so that the job is dispatched to our client on time.

We possess 'Postal Licenses' that helps franking the articles immediately which can be delivered to the end user directly.

From arranging the orders within the warehouse properly till inventory management, various steps and techniques adopted by our logistics and dispatch team leads to just in time delivery and satisfied clients.
